Run, obs. form of ROUN.

Run (rʌn), *v.* Forms: (see below). Pa. t. **ran**. Pa. pple. **run**. [A verb of complicated history in Eng., representing two forms originally distinct (a strong intransitive and a weak transitive), each of which was subject to metathesis; the forms are thus to some extent parallel to those of BURN *v.*[1] The strong intr. verb is represented by OE. *rinnan* (*ran*, **runnon*, [*gerunnen*]), = OFris. *rinna*, *renna*, *runna* (*ran*, pa. pple. *runnen*, *ronnen*), mod.WFris. *rinne*, *ronne* (*roan*, pa. pple. *roun*), NFris. *ren* (*ruan*, *ronen*), *ran*, etc.; MDu. *rinnen* (*ran*, *geronnen*); OS. *rinnan* (*ran*, *runnun*, —), MLG. *rinnen* (*ran*); OHG. *rinnan* (*ran*, *runnun*, *girunnan*), G. *rinnen* (*rann*, *rannen*, *geronnen*); ON. *rinna*, later (also mod.Icel., Fær., Norw.) *renna* (*rann*, *runnu*, *runninn*), MSw. *rinna* (also mod.Sw.), *rynna* (*ran*, *runno*, *runnin*), MDa. *rinde* (*rand*, *runde*, *runden*), Da. *rinde* (*randt*); Goth. *rinnan* (*rann*, *runnun*, *runnans*). Of this type, however, very few examples occur in OE. texts (four or five in all of the simple verb, chiefly in verse, and a similar number of the pa. pple. from the compound **gerinnan*). The prevailing form in all dialects appears to have been that with metathesis, *irnan*, *igrnan*, *yrnan* (*arn* or *orn*, *urnon*, *urnen*): for the later history of this see the forms below. The weak causative verb, of which the original form was **rannjan*, is represented in the cognate languages by OFris. *renna* (p. p. *rent*), MDu. *rennen* (*rende*, *rande*, *gerent*, *gerant*; Du. *rennen*), OS. *rennian*, MLG. *rennen* (*rende*, *rande*, etc.), OHG. *rennan*, (*ranta*, *girant*), MHG. and G. *rennen* (*rannte*, *gerannt* and *rennte*, *gerennt*), ON. (also Icel., Fær., Norw.) *renna* (*renndi*, *rennd*), MSw. and Sw. *ränna* (*rände*, *ränt*), MDa. and Da. *rende* (*rende*, *rendt*). In OE. it appears only in the metathetic form *wrnan*, *earnan* (usually in the sense of 'to ride').

The extreme rarity of OE. *rinnan*, and the entire absence of an OE. **rennan*, render it probable that ME. *rinne*(*n* and *renne*(*n* are mainly, if not entirely, due to the influence of ON. *rinna* and *renna*. To a great extent they first appear in texts where Scand. influence is prominent.

The different OE. and ME. types, partly by natural development of the vowels and partly by interaction of the various tenses of the strong verb, gave rise to a large number of variations, for which see the forms below. The weak conjugation, properly belonging to the causative but soon extended to the intransitive verb, remained fairly common until *c* 1400, and still survives to some extent in dialects.

In the sense 'to curdle' the causative form exists in mod. dialects as EARN *v.*[2] For the ME. forms representing the OE. compound *ge-yrnan*, see YERN *v.*]

B. Signification.

I. Intransitive senses.

The conjugation of the perfect and pluperfect tenses with *be* instead of *have* (as *is run, was run,* etc.) is occasionally found in literary use down to the end of the 18th century.

**Of persons and animals, in literal or fig. senses.*

1. To move the legs quickly (the one foot being lifted before the other is set down) so as to go at a faster pace than walking; to cover the ground, make one's way, rapidly in this manner.

Run may be construed with a large number of preps. and advs., as *about, after, against, at,* etc. Some idiomatic uses arising from such phrases are treated under III and IV, and others will be found under some other distinctive word in the phrase (as Random *sb.* 3).

The OE. *risc* (*rix*) and *risce* (*rixe*) correspond to MDu. *risch,* MLG. *risch(e, rysse,* and *risk, rysk,* LG. *risch(e, risk(e,* WFris. *risk,* and it is no doubt these forms, rather than *ryse,* which are represented by ME. *risch(e.* The evidence for OE. *ryse* is very slight, but is strengthened by the existence of continental forms with *u,* as Du. *rusch* (16th cent.), MLG. *rusch,* MHG. *rusch(e,* G. *rusch,* LG. and WFris. *rusk* (LG. also *rüsschen, rüsken,* etc.); whether ME. *rusch(e* is merely a dialectal representative of OE. *ryse,* or is due to foreign influence, is not clear. The continental forms, however, are prob. the source of OF. *rusche, rousche, rouche* (mod.F. dial. *rouche, rouce*), rush, reed, or sedge, which may have had some effect in ME. The OE. *resce* (found only once) appears to have no parallel in the cognate languages; the northern and Scottish *rash* is probably a variant of this, as in the case of *nash* for NESH *a.*

All the forms might have arisen as natural variants from an ablaut series **resc-, rasc-, rusc-,* but the disturbing effect of both *r* and *sh* on adjacent vowels makes it uncertain how far this is really the case. The German adj. *rasch* has an almost parallel series of variants, and some ultimate connexion between this and the sb. is not impossible. The suggestion that the Teutonic word is an early adoption, with complete change of meaning, of L. *ruscum,* butcher's broom, is in the highest degree improbable.]

Ry-, a common ME. spelling in all words beginning with RI-, as *ryal* RIAL *a.*, *ryb* RIB *sb.*, *rybald* RIBALD, *ryband* RIBAND, etc. For variants not entered below, see the corresponding forms with RI-.

-ry, *suffix*, a reduced form of -ERY, occurring chiefly after an unstressed syllable ending in *d, t, l, n*, or *sh* (the usual type being words of three syllables with the stress on the first), but also in a few cases after stressed vowels or diphthongs. The older examples sometimes represent OF. forms in *-rie*, with variants in *-erie*, but the great majority are comparatively late English formations. Examples of the various types are *heraldry, husbandry, ribaldry, wizardry*; *casuistry, dentistry, harlotry, infantry, papistry, peasantry, tenantry*; *chivalry, devilry, rivalry*; *blazonry, yeomanry*; *Englishry, Irishry*; *avowry, Jewry*. In some cases both *-ery* and *-ry* are in use, as *baptist(e)ry, command(e)ry, jewel(le)ry*.

S-SH

By HENRY BRADLEY.

PREFACE TO S—SH.

THIS half-volume, containing the words from the beginning of S to the end of Sh, includes 9,431 Main words, 3,470 Combinations explained under these, and 4,192 Subordinate entries; in all 17,093. The obvious combinations, illustrated by quotations but not requiring explanation, number 3,551 more, making a total of 20,644. Of the Main words, 1,671 are marked † as obsolete, and 477 are marked ‖ as alien or not fully naturalized.*

The half-volume may be divided naturally into two portions, which differ markedly with regard to the etymological character of the words included. The words from *S* to *Sgraffito* form a fairly typical specimen of the composition of the English vocabulary; all its linguistic sources are copiously represented, and probably in something like their average proportions. The words of classical and French origin, taken together, outnumber all the rest, and (notwithstanding the greater average length of the articles on native words) occupy at least as much space. When we turn to the words with initial SH (which is practically a distinct letter from S) we find that classical and French derivatives are all but entirely wanting (the few instances being due to exceptional circumstances), and adoptions from Scandinavian are also absent. Although there are a considerable number of words adopted from various other languages, or of obscure origin, the *Sh* division of the vocabulary is essentially of Old English etymology. It would not be possible to find elsewhere in the Dictionary an equal number of consecutive pages in which the proportion of native words is at all nearly so high.

The article on the verb *set* is, it will be observed, by far the longest in the Dictionary. This is due in part to the multitude of senses and idiomatic uses of the simple verb, and in part to the abundance of its fixed combinations with adverbs (as *set in*, *set out*, *set up*), which in languages of more synthetic structure are represented by compound verbs. There are twenty-two of these combinations, each of them virtually a separate word, which has undergone an extensive sense-development of its own; *set up* (to quote the extreme case) has forty-four distinct senses, several of which have subdivisions. The other articles are not of extraordinary length, but many of them (e. g. *shape* sb. and vb., *sheet* sb.[1] and sb.[2], *shoot* vb., *show* sb. and vb.) exhibit very noteworthy changes and ramifications of the meaning of words. The quotations for words like *science*, *scientific*, and the many derivatives of the Latin *sentire* (from *sensate* to *sentimentally*) contain much illustration of the history of English and European thought. The article on the verb *shall* has cost a great deal of labour, as the collected material was very inadequate, and had to be largely supplemented by special research. Imperfect as the article must necessarily be, it is hoped that it will be of service not only in throwing light on the process by which the modern use of the auxiliary has been developed, but also as a guide to the precise interpretation of many passages in earlier writers.

The whole of the S material collected up to that time was sub-edited in 1881–2 by the late Mr. P. W. Jacob. The portion down to *Saucy* was re-subedited, and the new material incorporated, by Mr. J. Brown, M.A., Kendal, in 1902–5, and that from *Saud* to *Shy* was similarly re-subedited by the late Mr. J. Bartlett, B.A., in 1902–6.

The proofs have been regularly read, and many valuable additions and corrections suggested, by the Rev. Canon Fowler, D.D., Durham, the Rev. W. B. R. Wilson, B.A., Dollar, and latterly by Mr. W. W. Jenkinson (who has also rendered much help in the verification of quotations at the British Museum), and Mr. Logan Pearsall Smith, M.A.

Of the many friends who rendered valuable assistance and advice in the treatment of the earlier words in S, several are no longer living. Dr. Furnivall and Professor Skeat, whose constant help has been acknowledged in the preface to every volume of the Dictionary, lived to see the publication of some of the sections of this half-volume. Other helpers who have been removed by death since the issue of S began are Mr. A. Caland, Wageningen, Holland; Mr. J. Platt, Jr.; and Professors Morfill and Robinson Ellis, Oxford. Among those still living to whom thanks are due for information on particular points are: Professors Bullock, Clifton, Elliott, Firth, Goudy, Love, Margoliouth, Napier, and Sir Walter Parratt, D.Mus., Oxford; Dr. Ingram Bywater; Mr. J. E. Bridges, Lecturer in Burmese, and Lieut.-Col. Ranking, Lecturer in Persian, Oxford; Bodley's Librarian; Dr. A. E. Cowley, Bodleian Library; Don M. de Z. Wickremasinghe, M.A., Indian Institute,

Scart *sb.*[1] In list of Forms dele '9 scrath (? error)' and read 'See also SCRATH'.

Schiller. The Ger. word has been used by English entomologists in the literal sense: 1835 J. DUNCAN *Beetles* 87 The elegant tribe of *Cetoniadæ* . . are generally of a fine green, often accompanied with a delicate schiller or play of colour.

Scholiastic. Pronunciation: For 'skɒuliæstik' read 'skōuliæ'stik'.

Seed *sb.* 5 a. Earlier example:—1620 *Observ. Making Fit Rooms Silkworms* 5 The Silk-wormes comming of ten ounces of seed..must [etc.].

Seeker 1 b. The date and authorship of the first quotation seem to be highly questionable. The passage quoted from Pagitt 1645 appears to contain the earliest known example of the use of the word as the designation of a sect, though the opinion there described was held by the three brothers Legate (*c* 1600), whose followers were called Legatine-Arians. (See C. Burrage, *The Early English Dissenters*, 1912, I. 214–6, 259–61, and App. A.)

Sentimentalize *v.* 1. Earlier example:—1764 *Let. to W. C.* 5 Aug., Orig. Lett. (1788) 14. In the mean time we will philosophize and sentimentalize; the last word is a bright invention of the moment in which it was written, for yours or Dr. Johnson's service.

Sepal. The etymology should be as follows:—[ad. F. *sépale*, mod.L. *sepalum* (N. J. de Necker, *Phytologie philosophique*, 1790, p. 55, and *Corollarium ad Philosophiam botanicam Linnæi*, 1790, p. 18). Necker derives the word from Gr. σκέπη covering; as he refused to acknowledge the distinction between the calyx and the corolla (using the term *perigynanda* to comprise both), *sépale* (*sepalum*) in his use denotes the petals as well as what are now called 'sepals'.]

Servetist. Earlier example:—1621 LODGE *Summary Du Bartas* I. 9 The ancient and moderne Diuines, who haue disputed against the Arians, and Seruetists.

Shiner 1 b. The word in the quotation is perhaps a misprint for *shiver* (pulley).

-ship. At end of first paragraph delete 'and perhaps . . . iegion'. The alleged OE. *landscaep* is due to a misreading: see Napier *Contrib. OE. Lexicogr.* (1906) 41.

Shirley. For '*Obs.* or *spurious*' read '*Obs.*' The bird, a South American tanager, was named by G. Edwards (*Glean. Nat. Hist.*, 1764, III. 276) from *Shirley*, the family name of Earl Ferrers, to whom the specimen described belonged.

Shittle *a.* The form *shuttle* survives *dial.*; see SHUTTLE *a.*, where additional quotations are given.

Shoe *sb.* 6 c. The following examples of *shoe-thong* should have been given:—*c* 1000 *Ags. Gosp.* John i. 27 Ne eom ic wyrðe þæt ic unbinde his sceo-þwang. *c* 1200 ORMIN 10387 Þatt he ne wass nohht god inoh Cristess shoþwang tunnbindenn. *c* 1200 *Trin. Coll. Hom.* 137 Ac ich nam noht ne forðen wurðe þat ich un-cnutte his sho þuong.

NOTE.

THIS double section includes 1770 Main words, 681 Special Combinations explained under these, and 910 Subordinate entries; in all 3361. The *obvious combinations* recorded and illustrated number 525, making a total of 3886. Of the Main words 378 (21 %) are marked † as obsolete, and 151 (8½ %) are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *S* to *Sauce*	329	2212	2427	2522	3886
Words illustrated by quotations	248	511	571	154	2966
Number of illustrative quotations	692	681	1371	186	14308

* Including the Supplement of 1902.

The number of quotations in the corresponding portion of Richardson is 674.

Of the words here treated those of Old English origin form numerically but a small minority, and the amount of space which they occupy is not large. The adoptions from Old Norse number only two or three, but among them is the important word *same*. The bulk of this portion of the vocabulary is of Latin and French etymology, and there are many Greek derivatives, some of which come through mediæval Latin, while others are modern scientific formations. The Celtic element is represented only by the 'alien' word *Sassenach*. Of Hebrew origin are *Sabaism*, *Sabaoth*, *sabbath*, *Sadducee*, *sagan*, *Samson*, *sanhedrim*, *Satan*. There are about a dozen words from Arabic, Turkish, Persian, and Indian languages, three or four from Chinese and Japanese, and several from the languages of North and South America.

An exceptional feature of this instalment is that it contains no long articles. The longest, *salt* sb.[1] and *sand* sb.[1], extend only to about two pages each, and the relatively large space which they occupy is due, not to the variety of senses in which the words have been used, but to the abundance of their combinations. While, however, this portion of the Dictionary does not include any words of which the sense-history is remarkably diversified, it includes many that present interesting individual points of development of meaning; examples are *sabbath*, *sable*, *sad*, *safe*, *saint*, *sake*, *salary*, *salt*, *salute*, *salve* sbs. and vbs., *sanction*, *sanctuary*, *sap*, *sapient*, *satire*, *satisfaction*, *satisfactory*, *satisfy*. The quotations for *same* give evidence of some curious changes in the use and construction of the word which have hitherto escaped notice.

Among the words the correct etymology of which now appears for the first time in an English Dictionary are *Sabian*, *salse*, *salvatella*, *saphena*, *sash* sb.[1], *sashoon*, *sate*. Etymological facts or suggestions not given in previous dictionaries will be found also in the articles *sabras*, *sack* sb.[3], *sackbut*, *sad*, *Sadducee*, *safflower*, *saffron*, *sallow* sb., *salvo*, *sap* sbs. and vbs., *sarsaparilla*, *satrap*.

Salient *a.* 3.—The source of this use is Aristotle, *Hist. Anim.* VI. iii, Τοῦτο δὲ τὸ σημεῖον πηδᾷ καὶ κινεῖται ὥσπερ ἔμψυχον, 'this point [representing the heart in the egg] leaps and moves as alive.'

S.

S (es), the nineteenth letter of the English and other modern alphabets, and the eighteenth of the ancient Roman alphabet, derives its form (through the Ϛ and Ȿ, Ȝ of early Latin and Greek inscriptions) from the Phœnician W (Hebrew ש *shin*), which represented a voiceless sibilant: in some of the Semitic langs. (s), in others (ʃ). (Each of these phonetic symbols is intended to represent a class of sounds the articulatory positions of which vary considerably; the difference between the two classes is acoustically very recognizable, but the nature of the essential difference in formation is still obscure.) In ancient Greek and Latin the value of the letter is believed to have been always (s). In late L. *s* between vowels was in most instances pronounced (z), a sound which was not separately represented in the Latin alphabet. Hence when the Roman letters were adopted in OE., the letter S was used to represent both the unaltered Germanic (s), and the (z) which had been developed from that sound in certain positions.

In OE. *s* was pronounced (s) initially and finally, and medially when it was either contiguous with a voiceless consonant or began the second element of a compound; medially between voiced sounds it was pronounced (z). The southern dialect had in ME., and possibly in late OE., the peculiarity of voicing the initial *s* (in native words) as well as the initial *f* and *þ*. This phonetic habit extended to Kent as late as 1340, as is shown by spellings like *zenne* (OE. *synn*, sin) in the *Ayenbite of Inwyt*; it is now confined to the south-western dialects.

In mod. English the general rule is that *s* is pronounced (s) at the beginning of a word or of the second element of a compound, and when doubled or in contact with a voiceless consonant. Between vowels, and when phonetically final, a single *s* is mostly (z). But there are many anomalies and uncertainties, especially in classical derivatives: cf., e.g., *absurd* (æbsɜ·ɹd), *observe* (əbzɜ·); with regard to some words usage is divided, as in *absolve* (æbs-, æbz-), and the words in *-ive*, e.g. *effusive*, *evasive*. Even *ss* is in some words sounded (z), as in *dissolve* (against *dissent*, *dissect*, etc.), *dessert*, *possess*.

The phonetic combinations (sy), (zy), when rapidly pronounced, are very similar in acoustic effect to the simple consonants (ʃ), (ʒ), the position of the tongue for these being intermediate between the positions for (s) or (z) and (y). Hence in some words where earlier Eng. had (sy) or (zy), written either as *s* (before diphthongal *u*) or as *si*, the mod. language has (ʃ) or (ʒ), so that the letter has acquired these two new values. Examples are *sure*, *sugar*, *censure*, *mission* (miʃən), *Asia* (ēiʃə), *treasure* (-ʒŭ, -ʒəɹ), *evasion* (-ʒən). In some varieties of vulgar speech this tendency is carried much further, as in the pronunciations (ʃūː), (prɛʒɪm) for *sue*, *presume*.

S is silent in a few words adopted from Old French, as in *aisle*, *isle* (hence also pseudo-etymologically in *island*); in the Law French *mesne*, *demesne*, a silent *s* was inserted by false analogy.

-S, *suffix*, forming adverbs, was originally *-es*, identical with the suffix of the genitive singular of many neuter and masculine sbs. and adjs. Several of the adverbs in *-es* that existed in OE. are genitives either of sbs. (neut. or masc.) as *dæges* by day, *nihtes* Needs, *þances* voluntarily, or of neuter adjs., as *sōðes* truly; on the analogy of these, *-es* was added, with adv.-forming function, to feminine nouns, as in *nihtes* by night, *endehyrdes* in order. OE. had also advs. compounded of *tō* prep. and a genitive governed by it, as *tōgeġnes* (see To-gains), *tōmiddes* (see To-mids); side by side with these there existed parallel and synonymous advs. like *ongeġn* Again, *on-middan* Amid, in which the dat. or accus. was governed by a prep. Hence there arose in early ME. mixed forms such as *ayeines*, *amiddes*; and the frequent coexistence of the two forms of the same adv., one with and the other without *s*, led to the addition of *s* to many advs. as a sign of their function. In some instances the extended form prevailed, as in *ofttsoom*; in others it survived only in dialects, as in *oftens*, *gaylies* (Sc.). See also the articles -ling², -l(l)(n)gs, -ward, -wards, -way, -ways.

In *once*, *twice*, *thrice*, *hence*, *since*, etc., the suffix is written differently. In Against, Alongst, Amongst, Amidst, and the dialectal *onst* (see Osce), the original *-es*, *-s* has become *-st*.

The Sp., Pg., and It. forms are the ordinary names in those langs. for Saturday; but Pr. used *dis-sapte* (:-L. *diēs sabbati*) in that sense. A popular Latin nasalized form **sambatum* (of oriental origin) appears in F. *samedi* (:-**sambati diēs*), OHG. *sambaztac* (mod. G. *samstag*) Saturday.

The confusion with SABAOTH was not peculiar to England; it occurs in MHG. and in med.Latin.

The word is now very often written (like the names of the days of the week and of festivals) with initial capital.]

1. a. In the original use: The seventh day of the week (Saturday) considered as the day of religious rest enjoined on the Israelites by the fourth (or in mediæval reckoning the third) commandment of the Decalogue. Phrases, *to keep, break the Sabbath.*

The word was never in England, as in some continental countries, a vernacular synonym for Saturday, though English writers of med.Latin used *dies Sabbati* as frequently as *dies Saturni.*

b. Since the Reformation, often applied to 'the Lord's day', i. e. the first day of the week (Sunday) observed by Christians in commemoration of the resurrection of Christ. This use was originally connected with the opinion that the sabbatic law of the Decalogue remains in force under the Christian dispensation, the date of the 'Sabbath' having by Divine appointment been changed from Saturday to Sunday; but it occasionally appears in writers who did not hold this view. In Scotland it is still very common. (Phrases as in 1 a.)

The notion that the Lord's day is a 'Christian Sabbath', or, more commonly (as in quot. 1340 under a) a substitute for the Sabbath, occurs in theological writings from the 4th c. onwards, but was not popularly current before the Reformation. In English, *Sabbath* as a synonym for 'Sunday' did not become common till the 17th century.

Saber, obs. or U.S. form of SABRE.

Sabian (sē·biăn), *sb.* and *a.* Also 7–8 **Zabian,** 7–8 **Sabean,** 8 **Zabæan, Tsabæan,** 8–9 **Sabæan, Tsabian.** [f. Arab. صابي *ṣābiʾ* + -AN.

According to Nöldeke, the word represents the pr. pple. of the Aramaic צבע *ṣ̌baʿ* to baptize (the ע being changed into א as is usual in the Mandæan and cognate dialects). In the actual form in which the word occurs in Arabic, it has the appearance of being derived from the same root as the Hebrew צבא *ṣābā* host (see SABAOTH); hence, as certain sects claiming the name of Sabians were alleged to be worshippers of the stars, the name was (already by Maimonides in the 12th c.) interpreted as referring to 'the host of heaven'.]

A. *sb.*

1. An adherent of a religious sect mentioned in three passages of the Koran (ii. 40, v. 73, xxii. 17), and by later Arabian writers.

In the Koran the Sabians are classed with Moslems, Jews, and Christians, as believers in the true God. On account of the toleration extended by Moslems to them, the name of Sabians was, some centuries after Mohammed, assumed not only by the Gnostic half-Christian Mandæans (whose religion is perhaps akin to that of the true Sabians), but also by certain actual polytheists. The statement of some Arabic writers is that the Sabians were professedly Christian, but secretly worshippers of the stars. (Cf. SABAISM.)

1661 BOYLE *Style of Script.* (1675) 35 For want of knowing the Religion of the antient Zabians..Of those Zabiists..I find a deep and general silence in Classick Authors. 1797 *Encycl. Brit.* (ed. 3) X. 462 1 The fourth [*sc.* apartment of hell] named *al Sair*, [Mohammedans assign] to the Sabians. 1841 *Penny Cycl.* XX. 295/2 That the unity of the Deity was however still acknowledged in the religious system of the Tsabians is manifest from the way in which this religion is spoken of in the Korán.

b. Used for MANDÆAN (see quot. 1883).

1797 *Encycl. Brit.* (ed. 3) X. 458/2 The Sabians have several books which they attribute to some of the antediluvian prophets. 1883 K. KESSLER *ibid.* (ed. 9) XV. 467/2 *note*, In their dealings with members of other communions the designation they [*i.e.* the Mandæans] take is Sabians.

2. In erroneous use: A worshipper of 'the host of heaven'; a star-worshipper.

1716 PRIDEAUX *O. & N. Test. Connected* I. III. (1718) I. 140 The remainder of this sect still subsists in the east under the same name of Sabians..That which hath given them the greatest credit among the people of the east is, that the best of their astronomers have been of this sect..For the stars being the gods they worshipped, they made them the chief subject of their studies. 1864 COL. GREENWOOD in *Athenæum* 23 July 115/3 Bishop Cumberland and Bishop Warburton..agree that Cain..and his descendants were Sabæans. Abraham and Moses were Sabæans till Jehovah revealed himself to them.

B. *adj.* Pertaining to the Sabians (in the various applications of the name: see A).

ARNOLD *Ishmael* 35 In a Sabian Almanac..it is stated: 'They fast in it seven days..in honour of the great Lord, the Sun, the Lord of all Good.' 1886 *Encycl. Brit.* XXI. 128/1 It is quite inappropriate to call star-worshippers in general Sabians or Zabians or to speak of a distinct Sabian religion, as older writers do.

Sabianism (sē·biăniz'm). Also 9 **sabæanism.** [f. prec. + -ISM.] The religion of the Sabians; chiefly in erroneous use, worship of 'the host of heaven', star-worship. Cf. SABAISM.

The identity of the word with SABLE *sb.*[1] is commonly assumed, though some difficulty is presented by the fact that the fur of the sable, as now known, is not black but brown.

Some have conjectured that it may have been customary to dye sable-fur black (as is now often done with sealskin), perh. in order to heighten its contrast with ermine, with which it was often worn.

The development by which the heraldic term has become a general (poetical or rhetorical) synonym for 'black' is peculiar to English.]

Sack (sæk), *sb.*3 *Obs.* exc. *Hist.* Forms: α. 6 *north.* wyn seake, *Sc.* wyne seck, vyne sekk; β. 6 seckie; γ. 6 sakke, 6-7 sacko, 6- sack. [Early 16th c. *wyne seck*, ad. F. *vin sec*, 'dry wine'. Cf. G. *sekt*, earlier (17th c.) *sek*, Du. *sek*.

Vin sec is given by Sherwood 1632 (but not by Cotgrave 1611-32) as the Fr. equivalent of 'sacke'. According to Littré, *vin sec* meant only 'dry wine' in the current Eng. sense, i. e. wine 'free from sweetness and fruity flavour'; there appears to be no ground for the assumption made in Grimm's *Deutsches Wörterbuch*, s.v. *Sekt* (and in earlier German dictionaries from the 17th c. onwards), that it at some time meant 'wine from *dried* or partially dried grapes'. Some difficulty therefore arises from the fact that *sack* in English, as well as *sekt* in German, was often described as a sweet wine (so already in our earliest quot.), though Shakspere's mention of 'sack and sugar' shows that it was not always such even in the 16th c. It is possible that before the recorded history of the name begins it had already been extended from the 'dry' wines of a certain class to the whole class, and had afterwards come to be applied esp. to those wines of the class which were originally excluded. But evidence is wanting. The Sp. **vino seco*, It. **vino secco*, usually cited by etymologists, appear not to be recognized by the lexicographers of the respective langs.

The form *sack* is not a normal development from the original *seck*. It may perhaps be explained by the fact that in the 16th c. *seck* was a provincial form of SACK *sb.*1; persons who were accustomed to regard 'seck' as a mispronunciation of *sack* may have applied the supposed correction to the name of the wine. It is not, in the present state of the evidence, probable that there was ever any confusion with the OF. *vin de sac* (*Saccatum*, vin de buffet, vin de sac'), in a gloss quoted by Godefr.), OHG. *sacwin* (written *saicwin*), MDu. *sacwijn*, which according to early explanations meant a beverage made by steeping the lees of wine in water, and then straining through a bag.]

Sack (sæk), *sb.*4 Also 7, 9 sac, 8- sacque. [Cf. G. *französischer sack* (Grimm), Du. *zak*, both applied in the 18th c. to a French fashion of gown then worn by ladies. This, with Pepys' spelling (quot. 1668-9), would seem to indicate adoption from F. *sac*, but the Fr. lexicographers do not recognize the word in this sense.

It is possible that both the senses below, or sense 2 only, may have originated as transferred uses of SACK *sb.*1 To place them under that word would however be inconvenient, on account of the marked divergence of application, and the fact that the pseudo-Fr. spelling *sacque* is still frequent in both senses.

Sense 2 is given by M. Heyne (in *Grimm*) as a modern tailors' use of G. *sack* (also *sackpaletot* 'sack' overcoat); but this may possibly be from English.

In the following quot. *sackes* may denote some article of clothing, but its sense is obscure, and it is not certain that it is English:—

[a. F. *saquebute*, earlier *saqueboute*, *-botte*, etc.; not found as the name of a musical instrument earlier than the latter half of the 15th c., but presumably identical with ONF. *saqueboute*, explained in the 14th c. as a lance furnished with 'an iron hook for pulling men off their horses' ('un grau de fer pour les garchons *saquier* jus de leurs quevaulz'). In the modern Norman dialect the word means a squirt. The first element is clearly ONF. *saquier* (= Sp., Pg. *sacar*) to pull, draw (which accounts for all the senses of the compound); the etymology of the second element is obscure; some scholars connect it with *bouter* to push.

The Sp. *sacabuche* (cf. the 16th c. Eng. form *shagbushe*), sackbut, also tube used as a pump, and the Pg. *sacabucha*, *-buxa*, with the same meanings, appear to be corrupt adoptions of the Fr. word. The Pg. word is identical in form with a word meaning a hook for drawing the wad from a gun, regularly f. *sacar* to draw + *bucha*, *buxa*, wad. Possibly the Fr. word may, when adopted into Pg., have undergone assimilation to the native word and then passed in the altered form into Sp.; but evidence is wanting.]

1. An obsolete musical instrument; a bass trumpet with a slide like that of a trombone for altering the pitch.

The word is to most readers known only from its occurrence in Dan. iii, where it is a mistranslation of Aramaic *sabbekā*, which the LXX and Vulgate render (doubtless correctly) by Gr. σαμβύκη, L. *sambuca*, the name of a stringed instrument (see SAMBUCA). Coverdale 1535 (for what reason is not clear) renders the word by *shawmes*, thus taking it to denote a wind instrument; the Geneva translators, accepting this view, seem to have chosen the rendering 'sackbut' on account of its resemblance in sound to the Aramaic word. In this they have been followed by the 'Authorized' (1611) and 'Revised' (1885) Versions.

Sacrament (sæ·krămĕnt), *sb.* Forms: 3-6 **sacrement,** (*pl.* 2 **sacramens,** 3 **sacra-, sacremenz,** 4 **sacremens**), 4 **sakermente,** 5 **sacramen, sacriment, sakyr-, sacurment,** 5–6 **sacramente,** 2– **sacrament.** [a. F. *sacrement* (12th c. in Hatz.-Darm.), ad. L. *sacrāmentum* (whence the Fr. popular form *serment* oath), f. *sacrāre* to consecrate, set apart religiously, to secure by a religious sanction, f. *sacr-, sacer* holy, dedicated, set apart: see SACRED *a.*

In accordance with the functions of the suffix *-mentum* (see -MENT), the etymological sense of L. *sacrimentum* would be either (1) a result of consecration, or (2) a means of consecrating, dedicating, or securing by a religious sanction. The latter of these notions is that which seems to be present in the classical uses of the word: (1) the military oath, oath or solemn engagement in general; (2) the caution-money deposited by the parties to a lawsuit; hence (3) a civil suit or process. In Christian Latin from the 3rd century the word was the accepted rendering of Gr. *μυστήριον* MYSTERY[1]. This use is evidently not based on either of the specific applications above mentioned, but is the result of a recourse to the etymological meaning. In early Christian language *sacramentum* and the synonymous *μυστήριον* were applied indiscriminately to any ritual observance of the Church, or to any spiritually symbolic act or object; but they were also often applied in an eminent sense to the two most important observances, baptism and the Lord's Supper or Eucharist. For the later history of the use, see below in sense 1.]

1. *Eccl.* Used as the common name for certain solemn ceremonies or religious acts belonging to the institutions of the Christian church.

The English use before the Reformation adopts the enumeration of seven sacraments (believed to have been first formulated by Peter Lombard in the 12th c.; the same list is recognized in the Eastern Church): viz., Baptism, Confirmation, the Eucharist, Penance, Extreme Unction, Order, Matrimony. As late as the 14th c., however, there were still traces in English of the wider application of the word formerly current; while the seven sacraments were viewed as eminently entitled to the name, it could be applied in a more general sense to certain other rites (see quot. *c* 1315). From the 16th c., Protestants generally have recognized two sacraments only, viz. baptism and the Lord's Supper.

The formal definition of *sacrament* depends on the answer to the question what is the distinctive feature common to the seven or to the two 'sacraments', on account of which they form a separate class from all other observances. Those who accept the number seven, and many of those who admit only two sacraments, say that the sacraments differ from other rites in being channels by which supernatural grace is imparted. By those Protestants who deny that baptism and the Lord's Supper in themselves convey supernatural grace, the specific difference of the 'sacraments' from other observances is regarded as consisting in their paramount obligation as having been expressly commanded by Christ Himself, and in the special spiritual benefits obtainable by their faithful use.

By some of the English Puritans and Nonconformists, the word was avoided as being associated with opinions regarded by them as superstitious; the usual term applied by them to baptism and the Lord's Supper was *ordinance.*

1. Primarily, the slaughter of an animal (often including the subsequent consumption of it by fire) as an offering to God or a deity. Also applied *fig.* to the offering of prayer, thanksgiving, penitence, submission, or the like. Phrases, † *to do, make sacrifice*; also, † *to put in sacrifice*, to devote as a sacrificial victim.

In the primary use, a 'sacrifice' implies an 'altar' on which the victim is placed. Hence the figurative uses are often associated with references to a metaphorical altar.

1. The crime or sin of stealing or misappropriating what is consecrated to God's service. In ecclesiastical use, extended to include any kind of outrage on consecrated persons or things, and the violation of any obligation having a sacramental character, or recognized as under the special protection of the Church. Also, an instance of this offence.

In mediæval writings the classification of 'sacrilege' as a branch of avarice, which is based on the primary meaning of the term, is somewhat inconsistently combined with an enumeration of the varieties of sacrilege implying the wider sense explained above. b. *spec.* in popular use as a name for robbery from a church or other place of worship.

The term is not technically used in Eng. Law, though formerly special penalties were imposed for the offence. From the 17th c. a robbery from a church has been regarded legally as a 'larceny' or a 'burglary' according to the circumstances.

The prevailing modern view is that the Zadok referred to is the high-priest of David's time, from whom the priesthood of the Captivity and later periods claimed to be descended. The late Jewish notion of a post-exilian Zadok (*Çaddūq*), the founder of the sect, is now regarded as baseless; the hypothesis that the word is directly derived from *çaddīq,* righteous, is philologically untenable.]

1. A member of one of the three 'sects' (the others being the Pharisees and Essenes) into which the Jews were divided in the time of Christ. According to the New Testament and Josephus, they denied the resurrection of the dead, the existence of angels and spirits, and the obligation of the unwritten law alleged by the Pharisees to have been handed down by tradition from Moses.

In origin the Sadducees seem to have been not so much a theological or philosophical sect or school, as a political party composed of the nobility, i. e. the members and connexions of the high-priestly family.

Sag (sæg), *v.* Inflected **sagged, sagging**. Forms: 5–7 **sagge**, (6 **sacke**), 9 **sagg**, 6– **sag**; 8–9 *dial.* **segg** (see E.D.D.). [First recorded in the 15thc.; the meaning (as well as the 16th c. form *sacke*) appears to point to connexion of some kind with mod.Du. *zakken*, MLG. *sacken*, Sw. *sacka*, Norw. dial. *sakka* to subside, settle down (also *sakk* subsidence), Da. *sakke* to lag behind (the Du. and Sw. words have also the nautical sense below). With sense 3 cf. Norw. dial. *sagga* 'to walk heavily and slowly, as from weariness' (Ross), for which other dialects have *sigga, sugga*.

The Du., LG., and Sw. forms appear to admit of no etymological explanation as native words; on the other hand the Norw. dial. *sakka* may be related to *sakka* (ON. *sǫkkva*) to SINK. It seems possible that the word is originally WScandinavian, and has passed (*as a nautical term*) into Sw., Du., LG., and (perh. through LG.) into English.

On this hypothesis the representation of the continental Teut. *kk* by *gg* would be an instance of the common uncertainty in the phonetic appreciation of foreign sounds. It is uncertain whether the Norw. dial. *sagga* abovementioned is related to the other words, and whether its resemblance in sense to the Eng. word is more than a coincidence.]

[OE. *sacu* str. fem. = OFris. *sake, seke* affair, thing, sake, OS. *saka* lawsuit, enmity, guilt, thing (MLG., MDu. *sake* lawsuit, affair, cause, reason, guilt, Du. *zaak* lawsuit, cause, sake, thing), OHG. *sahha* cause, sake, thing (MHG. *sache*, mod.G. *sache* thing, affair), ON. *sǫk* crime, accusation, action at law, cause, sake (Sw. *sak*, Da. *sag* in the same senses; also, influenced by Ger., thing) :—OTeut. **sakā*, related to the str. vb. **sak-*, represented by OE. *sacan* to quarrel, fight, claim at law, accuse, OS. *sakan* to accuse, OHG. *sahhan* to strive, quarrel, rebuke. From the same root are OE. *sæċe* (:—**sakjā*), Goth. *sakjô* (:—**sakjōn*), strife. An ablaut-variant of OTeut. **sak-* is probably the **sok-* represented by SEEK *v.*, q.v. for the cognates outside Teutonic.

The only use surviving in mod.Eng. ('for the sake of') has not been found in OE., and was prob. adopted from ON. It existed, however, in OHG. and OFris., and there is a possibility that it may have been in OE., though not evidenced in the literature. It seems to have arisen from the use of the sb. to denote a litigant's cause or case (see 1 b). Cf. L. *causā.*]

1590 SPENSER *F. Q.* I. v. 12 Tho mov'd with wrath, and shame, and Ladies sake.

II. Phr. *For the sake of* (also **† *for sake of***; *for* (one's, a thing's) *sake.*

In the latter of these forms, the word which precedes *sake* is a possessive (noun or pronoun); but down to the middle of the 19th c. the *'s* of the possessive of common or abstract nouns was very commonly omitted (doubtless owing to the difficulty of pronouncing the two sibilants in succession), and from the 17th to the early 19th c. the two sbs. were often connected by a hyphen, as if forming an attributive compound. The omission of the *'s* is now obsolete, but it is still not uncommon to write *for conscience sake, for goodness sake, for righteousness sake*, etc., without the apostrophe which is ordinarily used to mark the possessive of words ending in a sibilant.

The paragraphs marked β contain illustrations of the omission of the *'s*; some of the early examples there placed must be explained by the fact that the sbs. occurring in them (e.g. *soul*) had originally no *s* in the genitive.

5. Out of consideration for; on account of one's interest in, or regard for (a person); on (a person's) account.

Salic (sæ·lik, sē·lik), *a.* Also 6 **salicque**, 6–7 **-like**, 7 **sallick**, 7–8 **salick**, 6–9 **salique.** [ad. F. *salique* or med.L. *Salicus*, f. *Salii* (see SALIAN 2).]

1. *Salic law*: in early use, and still in popular language, the alleged fundamental law of the French

monarchy, by which females were excluded from succession to the crown; hence *gen.* a law excluding females from dynastic succession. In this sense still often spelt *Salique* and pronounced (sălī'k).

The ancient text which under the name of the 'Salic law' was adduced in favour of the succession of Philip V in 1316, and afterwards used to combat the claims of Edward III of England (and his successors) to the French crown, was really a quotation from the *Lex Salica* (see sense 2); the words however (cap. lix. § 5 of modern editions) have no reference to succession to the crown, but merely state that a woman can have no portion of the inheritance of 'Salic land' (*terra Salica*); the precise meaning of this term is disputed, and in the earliest form of the code the word 'Salic' is omitted.

a 1548 HALL *Chron., Hen. V* (1550) 4 b, The lawe Salicque was only fayned and invented to put your noble progenitours and you [Hen. V.] from your lawfull right and true inheritaunce. For they say that Pharamond made the lawe for the land Salicque, which the glose calleth Fraunce. 1599 SHAKS. *Hen. 2. In the original sense of L. *Salicus*: Pertaining to the Salian Franks. Chiefly in *Salic law* or *code* (L. *Lex Salica*), a Frankish law-book, written in Latin, and extant in five successively enlarged recensions of Merovingian and Carolingian date.

1781 GIBBON *Decl. & F.* xxxviii. (1787) III. 583 Before the election of the Merovingian kings, the most powerful tribe, or nation, of the Franks, appointed four venerable chieftains to compose the Salic laws. *Ibid.* 594 Besides these royal and beneficiary estates, a large proportion had been assigned, in the division of Gaul, of allodial and Salic lands. 1879 *Encycl. Brit.* X. 476/1 The Salic code, shows us the Salian king as in all respects the centre of his state.

The name originally comprised such substances as resembled common salt (sense 1) in their appearance or properties, e.g. substances produced by the evaporation of watery liquids as salt is produced by the evaporation of sea-water. The quality of taste was not originally considered to be a criterion of the class, but was added in the 18th c. when these substances were ultimately divided into 'acid salts' (*salia acida*), 'alkaline salts' (*salia alkalina*), and 'neutral salts' (*salia neutra*, *media*, or *salsæ*), corresponding to the modern 'acids', 'alkalis', and 'salts'.

6. *Mod. Chem.* A compound formed by the union of an acid radical with a basic radical; an acid having the whole or part of its hydrogen replaced by a metal. (In wider theoretical use the term 'salt' includes acids as salts of hydrogen.)

The first marked step towards the modern conception of a chemical salt was Rouelle's definition (*a* 1770) of a neutral salt as a compound formed by the union of an acid with any substance serving as a base for it and giving to it a concrete or solid form. Various modifications of this or earlier views were put forward until the publication of Lavoisier's definition of a salt as the union of an acid with an oxide; this definition, however, was found to be inadequate when the composition of the halogen compounds, sulphides, etc. came to be accurately known. A further revolution in the theory of salts was made by Berzelius, who divided them into two classes; viz. HALOID salts, formed of an electropositive element and a halogen, and AMPHID salts, resulting from the union of an acid and a base; the latter he subdivided into oxy-salts, sulpho-salts, selenio-salts, and telluri-salts. According to more recent conceptions (Arrhenius 1888) salts, including acids, are regarded as composed of positive ions or kations (hydrogen and metals) and negative ions or anions (halogens and acid radicals).

1790 KERR tr. *Lavoisier's Elem. Chem.* 150-1 Acids may therefore be considered as true salifying principles... This view of the acids prevents me from considering them as salts. ..I shall not arrange the alkalies or earths in the class of salts, to which I allot only such as are composed of an oxygenated substance united to a base. **1807** T.
